

**The ISA-Utah Chapter/
Utah Community Forest Council Presents
The Applied Use of the ISA Guide for Plant
Appraisal 10th Edition Two-Day Workshop
April 12 & 13, 2022
14 CEUs available for ISA certified arborists.
Utah State University – Salt Lake Center
920 West LeVoy Drive, Taylorsville, UT 84123**

This two-day workshop will provide comprehensive guidance on the current methods in plant appraisals as outlined by the 10th edition of the ISA's Guide for Plant Appraisal.

Course Instructor: Mark Duntemann, owner of Duntemann Urban Forestry, LLC. He is an ISA Board-Certified Master Arborist (RM-131B) and an ISA Tree Risk Assessment Qualification Instructor. He recently received a post-graduate certificate on risk assessment from Harvard's Chan School of Public Health, a course certification on Enterprise Risk Management from the Public Risk Management Association (PRIMA) and a course certification on operational risk assessment methods from the American Society of Safety Professionals (ASSP).

Mark is the International Society of Arboriculture's representative to the Council of Tree and Landscape Appraisers. In that capacity he researched and co-authored the 10th edition of the Guide of Plant Appraisal.

The Guide for Plant Appraisal, 10th Edition, Revised is the most informative and comprehensive alignment of current knowledge of the approaches, processes, and methods of plant valuation. This edition represents a systematic evolution of plant appraisal that integrates new research into a deeper understanding of the strengths and weaknesses of the available methods. Included in this edition are detailed discussions of newly streamlined core concepts and terminology, a review of the organization and context of appraisal reports, and an updated emphasis on appraiser awareness of the environmental and ecological benefits plants provide. Also new to this edition are appendices and a glossary. (Revised October 2020, softcover, 170 pp)

Tuesday, April 12, 2022

8:00am The Development Process
8:45 Updates to the Guide
9:30 Break
9:45 The Appraisal Process
11:00 Measurements
